

Industry Networking & Training Event!

10 April – Brisbane International Virginia
Connect . Engage . Learn

NCC 2019 Sprinkler Requirement

This CPD valued seminar will run through the NCC 2019 Sprinkler requirements plus Wet Fire Systems & their Performance with new and important Industry and Certification issues to discuss:

- *NCC 2019 Sprinkler requirements, National and QDC Impacts Class 2 and 3 and beyond*
- *Hydrants – New Design aspects, Systems coupled to domestic service,*
- *Block Plans, involving existing systems for alterations to existing buildings – MP6.1*
- *Fire Structure challenges, owners, Body Corporates*
- *Operational Fire Fighting Procedures*
- *Real-time examples with Group Discussion*

This seminar aims to provide **Building Surveyors, Hydraulic designers, Engineers, Services Trades and Property Consultants** better understanding of the new NCC 2019 Sprinkler requirements, Wet Fire Systems, and their performance. This seminar gives everyone within the industry a chance to discuss some of the most common issues and what to document for in the certification process. This seminar will provide valuable insight to NCC 2019 changes, system training, networking and current updates for compliance.
